Senior University Lecturer &
Director of CCS Capstone Program

COLLEGE OF COMPUTING SCIENCES

Date: 05/22/2020

Dear Sir/Madam,

Please accept this letter as an expression of confidence in Felixandrew Sapalaran's outstanding qualities as an IT leader. Felixandrew was my student in the capstone program at NJIT in the Spring of 2020. The capstone program is a real world project-based learning experience that aims to provide students with knowledge, skills and techniques needed to excel in the real world. In this program, students are not only practically trained in network administration and security (with emphasis on CISCO), software engineering, requirements management, software architecture, web and database programming, R&D skills and quality assurance methods but also in leadership, project management, communication, social and presentation skills.

Felixandrew achieved a high rank according to capstone program performance metrics. The student has taken extra responsibilities and demonstrated exceptional performance in technical development. They have also excelled in real world projects and impressed industry stakeholders.

This student's dedication was impressive. Project stakeholders were very pleased with the results of their work. Felixandrew was always proactive and very responsive in all project work. This student is a fast learner with an amiable personality.

The student's willingness to learn was also one of their unique qualifications. Felixandrew was professional in appearance, impressive in presentation skills, focused on the quality and content of what is being presented. I highly recommend Felixandrew, and I am confident that they will excel wherever they go and will add substantial value to any organization that they join.

Should you have any questions or concerns, please feel free to contact me or call me at my cell phone 732-456-0249 or email me at osama.eljabiri@njit.edu.

Thank you

A handwritten signature in dark ink that reads 'Osama Eljabiri'.

Sincerely,

Osama Eljabiri, PhD
